

EDITORIAL

- IJMS's Stance on Ethical Artificial Intelligence Usage for Medical Student Education and Research, and Highlights of IJMS in 2025.

ORIGINAL ARTICLES

- Clinical Audits in Medical Education: Insights from a Cross-Sectional Study of Medical Students.
- Insomnia Prevalence and Risk Factors Among Hispanic University Staff: A Cross-Sectional Study.
- Empathy in Practice: Comparing Physicians' Self-Assessment and Patient Perceptions Using the Jefferson Scales.
- A Retrospective Analysis Exploring the Impact of Psychiatric Comorbidities on the Time to Initiate HIV Treatment.
- Single Center Experience of the Impact of the COVID-19 Pandemic on Education and Career Outlook of Radiologists.

- Burnout in Ophthalmology Residents in a Tertiary Referral Hospital in Mexico City.

SHORT COMMUNICATION

- Using an Interactive Self-Directed Module to Teach Nicotine Use Disorder Management
- The Resilient Resident: A Resiliency Curriculum on Physical Medicine and Rehabilitation Resident Burnout

REVIEWS

- A Narrative Review of Women in Medicine Interest Groups at the Pre-Medical, Graduate, and Post-graduate Medical Education Levels.
- Navigating the Digital Frontier: A Review on the Applications of Artificial Intelligence in Medicine and Surgery.
- A Comprehensive Review of Hidradenitis Suppurativa: From Pathogenesis to Clinical Insights & Novel Therapeutic Advancements

CASE REPORTS

- Surgical Management of Refractory Pulmonary Actinomycosis: A Case Report.
- Port-a-Cath Fragmentation Causing Recurrent Chest Pressure and Dizziness in an Elderly Man, A Case Report.

EXPERIENCES

- A Reflective Case Study: Complex Presentation of a Veteran Patient with Cardiomyopathy and a History of Facial Reconstruction.

RETRACTION

- Retracted: Frequency Rhythmic Electrical Modulated System (FREMS) and its effect on the treatment of painful diabetic peripheral neuropathy: A systematic review and meta-analysis..

INTERNATIONAL JOURNAL *of* MEDICAL STUDENTS

The *International Journal of Medical Students* (IJMS) is an open-access, peer-reviewed scientific journal (ISSN [2076-6327](#)) that publishes original research in all fields of medicine. The Journal was created in 2009 to share the scientific production and experiences of medical students (*i.e.*, MBBS students, MD students, DO students, MD/MSc students, MD/PhD students, etc.) and recently graduated physicians (<3 years into practice) from all over the world. Our objective is to be the primary diffusion platform for early-career scientists, using standards that follow the process of scientific publication.

The *IJMS* receives submissions where there is at least one author enrolled as a medical student in any medical school in the world or a recently graduated physician worldwide. For research articles, early-career scientists must be accompanied by a senior researcher that must be also responsible for the research, guaranteeing the quality of the work. We publish Original Articles, Short Communications, Reviews, Case Reports, Interviews, Experiences, and Letters, which follow an [innovative and unique two-step, double-masked peer-review process](#), in brief:

The first step of revisions is carried out by two Student Editors (medical students with publications indexed in the US National Library of Medicine (NLM) with the supervision of an Associate Editor. The aim of this step is to improve the quality of articles and identify those that can proceed to external peer-reviews. The second step of revisions is carried out by external peer-reviewers who are researchers with publications indexed in the NLM related to the topic of the submission.

The time between submission and final publication in most cases has been two to four months depending on the diligence of Peer-Reviewers and Authors.

The *International Journal of Medical Students* is published online quarterly (March, June, October, December) by the [University of Pittsburgh Library System](#), a member of the [Open Access Scholarly Publishers Association](#), as part of its Pitt Open Library Publishing imprint.

The journal main office is located in the United States of America (USA). Any publication, dissemination or distribution of the information included in the Journal is permitted if the source is cited (*Int J Med Stud*).

The *International Journal of Medical Students* is indexed or abstracted in: Bielefeld Academic Search Engine (BASE), Dialnet Foundation (Dialnet), Directory of Open Access Journals (DOAJ), Directory of Research Journals Indexing, Elektronische Zeitschriftenbibliothek (EZB), e-Revistas, Geneva Foundation for Medical Education and Research, Google Scholar, Health InterNetwork (HINARI), Journal Seek Database, List of Publications that follow the International Committee of Medical Journal Editors (ICMJE), Mexican Index of LatinAmerican Biomedical Journals (IMBIOMED), NewJour, Open Academic Journals Index (OAJI), Online Computer Library Center (OCLC) WorldCat, Pubshub, Research Bible, Rubriq, SHERPA/RoMEO, Scientific Indexing Services (SIS), The e-Journal Gateway (J Gate), The Open Access Digital Library, Ulrich's International Periodical Directory/Summon by Serial Solutions.

The *IJMS* acceptance rate in 2022 was 27.5% of the almost 502 submissions. Published articles in 2022 came from 34 different countries. The average days to a first decision is 4 days, 117 for acceptance, and 10 days to decline a submission. The time between submission and final publication in most cases has been three to four months depending on the diligence of Peer-Reviewers and Authors.

The journal's website got over 269 thousand visits only in 2022. The *IJMS*'s reach includes a growing social media presence (more than 20,000 followers on [Twitter](#), [Facebook](#), [Instagram](#), [YouTube](#), and [LinkedIn](#)). Only in the last year, the Journal has been visited from nearly every place in the world (+190 countries). You can find more of the *IJMS* [statistics here](#).

The Journal and the Editorial Board are not responsible for the opinions expressed by the Authors of all materials published, nor do these represent the Official Policy or medical opinion of the Journal or the institutions with which they are affiliated unless otherwise stated.

Open Access Policy

This journal provides immediate open access to its content. Our publisher, the University Library System at the University of Pittsburgh, abides by the Budapest Open Access Initiative definition of Open Access to open access to peer-reviewed research literature as "(...) free availability on the public internet, permitting any users to read, download, copy, distribute, print, search, or link to the full texts of these articles, crawl them for indexing, pass them as data to software, or use them for any other lawful purpose, without financial, legal, or technical barriers other than those inseparable from gaining access to the internet itself. The only constraint on reproduction and distribution, and the only role for copyright in this domain, should be to give authors control over the integrity of their work and the right to be properly acknowledged and cited."

Furthermore, we encourage authors to post their pre-publication manuscript in institutional repositories or on their websites prior to and during the submission process, and to post the Publisher's final formatted PDF version after publication. These practices benefit authors with productive exchanges as well as earlier and greater citation of published work.

There are no article processing charges, submissions fees, or any other costs required of authors to submit, review or publish articles in the IJMS.

Peer Review Process

All papers submitted to the International Journal of Medical Students will undergo a two steps peer-reviewers process. The first step of revisions is carried by two anonymous Student Editors who will work together with one Associate Editor. In the second step, the manuscript will be reviewed by two anonymous reviewers (Editorial Board members, Associate Editors and/or invited reviewers with expertise in the subject matter). Authors will remain anonymous to all the referees.

The *IJMS* review process guarantees and supports the quality and validity of the work published at the *IJMS*. Reviewers are given three weeks to complete their tasks.

Reviewers and editors are obliged to retain the contents as privileged and confidential until publication. The Editor in Chief and the Editorial Board will have final authority over an article's suitability for publication.

The *IJMS* also strive towards the training of a new generation of Editors and Peer-reviewers promoting different training strategies among our Editorial Team that includes the [Web of Science Academy courses](#) and the [Committee on Publication Ethics \(COPE\)](#) courses available to its members (*IJMS* is a member of COPE).

Archiving

This journal utilizes the LOCKSS system to create a distributed archiving system among participating libraries and permits those libraries to create permanent archives of the journal for purposes of preservation and restoration.

Reviews

- A Narrative Review of Women in Medicine Interest Groups at the Pre-Medical, Graduate, and Post-Graduate Medical Education Levels 434
Sarah Bhagudas, Alisha Crump, Gabriela Azevedo Sansoni, Marah Kays, Shikha Jain, Rakhee Bhayani.
- Navigating the Digital Frontier: A Review on the Clinical Applications of Convolutional Neural Networks and Emerging AI Models in Medicine and Surgery 441
Sri Sai Rohit Kosuri, David Sunnucks.
- A Comprehensive Review of Hidradenitis Suppurativa: From Pathogenesis to Clinical Insights & Novel Therapeutic Advancements 452
Jeevan Rivera-Díaz, Sofía Laguna Rocafort, Ingrid M. Bonilla, Alejandra Figueroa Moreda, Jose Rabelo Cartagena.

Case Report

- Surgical Management of Refractory Pulmonary Actinomyces: A Case Report 462
Mauricio Alejandro Saldaña-Ruiz, Jaime Eugenio Espinosa-Mora, Mauricio Linnery Rendón-Saldivar, Federico Ortiz-Alonso, Leopoldo David Trujillo-García.
- Port-a-Cath Fragmentation Causing Recurrent Chest Pressure and Dizziness in an Elderly Man: A Case Report 465
Tyler Tepfenhart, Callie Fort, Marcel Twahirwa, Bryce Jensen.

Experience

- A Reflective Case Study: Complex Presentation of a Veteran Patient with Cardiomyopathy and a History of Facial Reconstruction 469
Zainab AL-Rubaiy.

Retraction

- Retracted: Frequency Rhythmic Electrical Modulated System (FREMS) and its effect on the treatment of painful diabetic peripheral neuropathy: A systematic review and meta-analysis 472
Khaled Moghib, Ayman Hassan, Yumna Mahmoud.
