# INTERNATIONAL JOURNAL *of* MEDICAL STUDENTS

**T**he *International Journal of Medical Students* (IJMS) is a peer-reviewed, open-access journal created to share the scientific production and experiences of medical students and recently graduated physicians worldwide. Our objective is to be the primary diffusion platform for medical students and recently graduated physicians, using standards that follow the process of scientific publication.

The Journal receives contributions and unpublished manuscripts of Original Articles, Short Communications, Reviews, and Case Reports, which are reviewed by experts (Peer-Reviewers) who have previously published similar research. In addition, the Journal accepts Interviews, Experiences, and Letters reviewed by the Editorial Team. This supports the quality and validity of the publications. The time between submission and final publication in most cases has been two to four months depending on the diligence of Peer-Reviewers and Authors.

The *IJMS* is published online triannually by the University Library System, University of Pittsburgh. The Journal's main office is located in the United States of America (1400 Locust St, Suite 3103, Pittsburgh, PA 15219). Any publication, dissemination, or distribution of the information included in the Journal is permitted if the source is cited (Int J Med Students).

The Journal is indexed or abstracted in: [Bielefeld Academic Search Engine \(BASE\)](#), [Directory of Open Access Journals \(DOAJ\)](#), [Elektronische Zeitschriftenbibliothek \(EZB\)](#), [Google Scholar](#), [Health InterNetwork \(HINARI\)](#), [Journal Seek Database](#), [List of Publications that follow the International Committee of Medical Journal Editors \(ICMJE\)](#), [Mexican Index of Latin American Biomedical Journals \(IMBIOMED\)](#), [Online Computer Library Center \(OCLC\) WorldCat](#), [Bibliotheca Alexandrina Information for Africa](#), [Pubshub](#), [Research Bible](#), [JournalGuide](#), [The e-Journal Gateway \(J Gate\)](#), [The Open Access Digital Library](#), [Publons](#), [Ulrich's International Periodical Directory/Summon by Serial Solutions](#).

The Journal and the Editorial Board are not responsible for the opinions expressed by the Authors of all materials published, nor do these represent the Official Policy or medical opinion of the Journal or the institutions with which they are affiliated unless otherwise stated.

## **Open Access Policy**

This journal provides immediate open access to its content. Our publisher, the University Library System at the University of Pittsburgh, abides by the [Budapest Open Access Initiative definition of Open Access](#):

“By “open access” to [peer-reviewed research literature], we mean its free availability on the public internet, permitting any users to read, download, copy, distribute, print, search, or link to the full texts of these articles, crawl them for indexing, pass them as data to software, or use them for any other lawful purpose, without financial, legal, or technical barriers other than those inseparable from gaining access to the internet itself. The only constraint on reproduction and distribution, and the only role for copyright in this domain, should be to give authors control over the integrity of their work and the right to be properly acknowledged and cited.”

Researchers engage in discovery for the public good, yet because of cost barriers or use restrictions imposed by other publishers, research results are not available to the full community of potential users. It is

our mission to support a greater global exchange of knowledge by making the research published in this journal open to the public and reusable under the terms of a Creative Commons [CC-BY](#) license.

Furthermore, we encourage authors to post their pre-publication manuscript in institutional repositories or on their Web sites prior to and during the submission process, in-press versions, and to post the Publisher's final formatted PDF version after publication. These practices benefit authors with productive exchanges as well as earlier and greater citation of published work.

**There are no article processing charges, submissions fees, or any other costs required of authors to submit, review, or publish articles in the IJMS**

#### **Peer Review Process**

All papers submitted to the International Journal of Medical Students will undergo a two steps peer-reviewers process. The first step of revisions is carried by two anonymous Student Editors who will work together with one Associate Editor. In the second step, the manuscript will be reviewed by two anonymous reviewers (Invited reviewers with expertise in the subject matter. Exceptionally, Editorial Board members or Associate Editors are invited as reviewers). Authors will remain anonymous to all the referees.

The typical time taken to conduct the reviews is one to two months. More information can be found at [www.ijms.info](http://www.ijms.info)

Reviewers and editors are obliged to retain the contents as privileged and confidential until publication. The Editor in Chief and the Editorial Board will have final authority over an article's suitability for publication.

#### **Archiving**

The *IJMS* utilizes the [LOCKSS](#) (Lots of Copies Keep Stuff Safe) and [CLOCKSS](#) (Controlled LOCKSS) systems to create a distributed archiving system among participating libraries and permits those libraries to create permanent archives of the journal for purposes of preservation and restoration.

#### **Statement on Publishing Ethics**

Adherence to ethical standards for the dissemination of research results is critical to the research process. The International Journal of Medical Students adheres to the [Code of conduct and best practice guidelines](#) of the Committee On Publication Ethics (COPE), the [Code of Conduct](#) of the Open Access Scholarly Publishers Association (OASPA), and the [Principles of Transparency and Best Practice in Scholarly Publishing](#) of the Directory of Open Access Journals (DOAJ).
